

What's New in **ppm+**

Mortality Review

Applies to: All Users

We have introduced a new Mortality Review form enabling clinicians to review all patient deaths. This form will allow clinicians to determine if the patient death needs to be reviewed and share the outcomes to improve learning with other specialties where appropriate.

Mortality Review Tool

(Mrs) Born **09-Jun-1908** Gender **Female** NHS No.
 Died **30-Dec-1992** Age at Death **84y**

Address **LS8** PAS No.

Specialty

Please select a Specialty
VASCULAR SURGERY

Mortality Review Tool

Why was this case chosen for level 2 review?

Please outline in box below Eg Routine (either all deaths in specialty reviewed, or this case was sampled randomly), or, Issue identified in part 1 of screening tool.

Please outline in box below Eg Routine (either all deaths in specialty reviewed, or this case was sampled randomly), or, Issue identified in part 1 of screening tool.

Please review the patient's background, admission, procedures and events leading to death. You may wish to consider the following issues but these are not intended to be exhaustive or exclusive:

- Problems in assessment, diagnosis and management, including whether the patient had appropriate senior medical input
- Timeliness of diagnosis, investigations, delivery of care/treatment
- Appropriate monitoring and response to e.g. early warning scores, abnormal test results
- Harms including (but not limited to) hospital acquired VTE/MRSA infection/C.difficile infection/inpatient fall/pressure ulcer/allergic
- Appropriate escalation of care, including critical care outreach/HDU/ICU care
- Communication between healthcare professionals, or with family
- Quality of end of life care, including timely and appropriate DNACPR decision where appropriate
