

ppm+ Release contents v18.0.26:

Date Expected Live: Monday 11 February 2018

Contents: V18.0.26 is a minor release to deploy the following:

- LCR have prioritised displaying when a patient is known to a Hospice (currently St Gemma's or Wheatfields) so that clinicians are aware of when a patient is known to a Hospice and can ensure the Hospice is aware or involved in the continued delivery of care.

This consists of two elements;

- 1) Integration to display the tab if a referral is open, and to identify which hospice patient is referred to
- 2) a new tab and a dynamic message within advising the user that the patient has been referred to EITHER St. Gemma's OR Wheatfields hospice and displaying appropriate contact details

- Addition of logging to permit capture of information related to eDAN usage, this is to aid investigation of currently reported issues with eDAN performance on Mondays and Fridays in particular.

Features:

[CP-14552] - LCR: Accessing the Hospice Tab

[CP-14555] - LCR: Hospice tab

[CP-12345] - Logging Hotfix *
