

ppm+ Release contents v18.1.10 PPM+ & v18.1.4 PPM+ Prj

Date Expected Live: Tuesday 17 April 2018

Contents: V18.1.10 PPM+ is a hotfix release to deploy the following:

- The Scanned location column time and date format has been amended from 10:31 05-Jan-2017 to a shortened format 3d 2h 1m
- Allow users of the eDAN custom list to be able to see the date that the eDAN was authorised, so that they can focus on which eDAN need prioritising. (Report)
- Bug fix so that when pharmacist changes the medications on discharge and verifies them in one session, the eDAN should remain at pharmacist stage.

Features:

[CP-15339] - Addition of Authorised Date column (Report)

[CP-14794] - Scanned Location Column: Shorten date/ time format to d/h/m

Bug Fixes:

[CP-15952] - eDAN: When Pharmacist makes changes to Discharge Meds, eDAN reverts to Clinician stage
