

## 18.6.7 PPM+ Custom List Issues Hotfix Release Contents

**Date Expected Live:** 19/11/2018

**Contents:** 18.6.7 PPM+ Custom List Issues is a hotfix release to deploy the following:

- When the user has defined their custom list for all patients admitted under a consultant all of the patients should be returned.
- When the user has selected Print All (List) from their custom list, and added the 'Patient Details' column they should be able to see the patients demographics displayed in the print out/print preview prior to printing.
- When the user has selected Print All (List) from their custom list and added 'Handover Comments' and 'Clinical Summary' prior to printing they should be displayed in the print out/print preview.
