Taking a Reading, Partial Observations and Interventions using the PPM+ mobile app

Once you have selected your patient, to take an observation, select eObs and then Take Reading.

To ensure you are recording a reading on the correct patient, scan the patient's wristband.

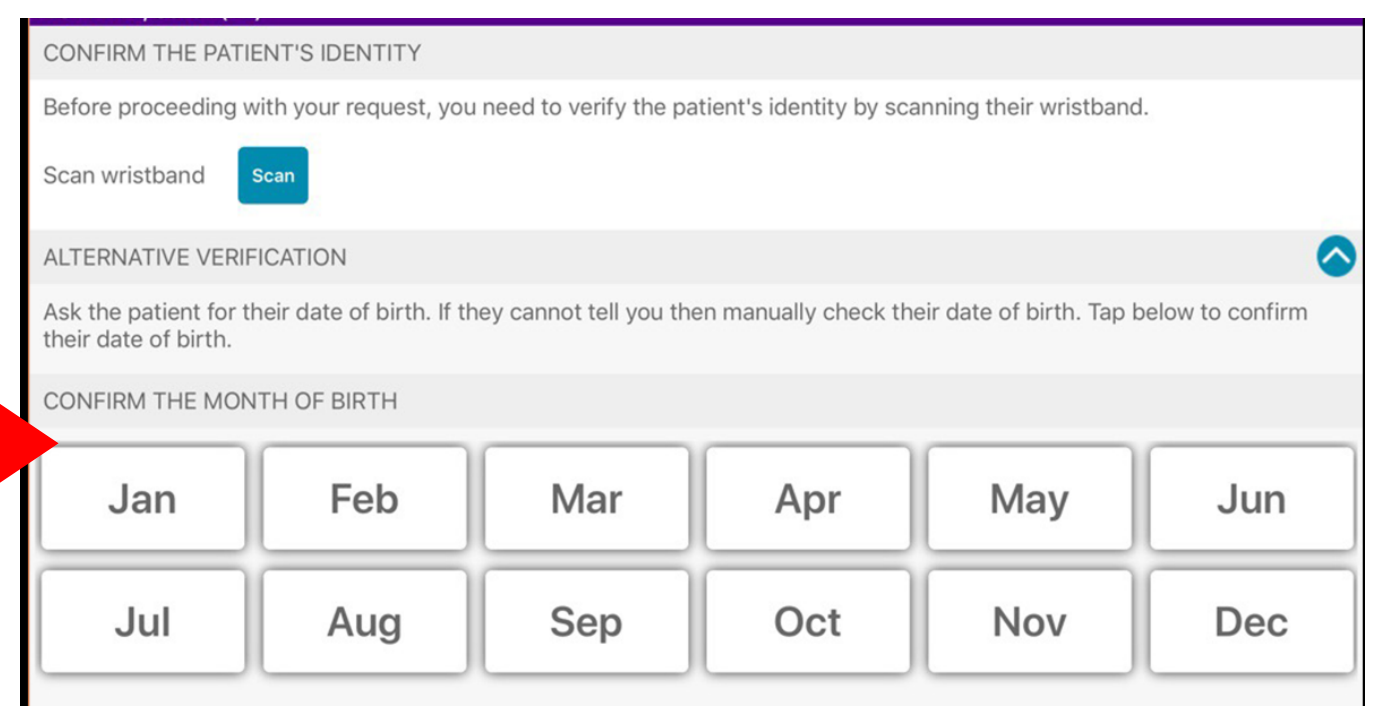

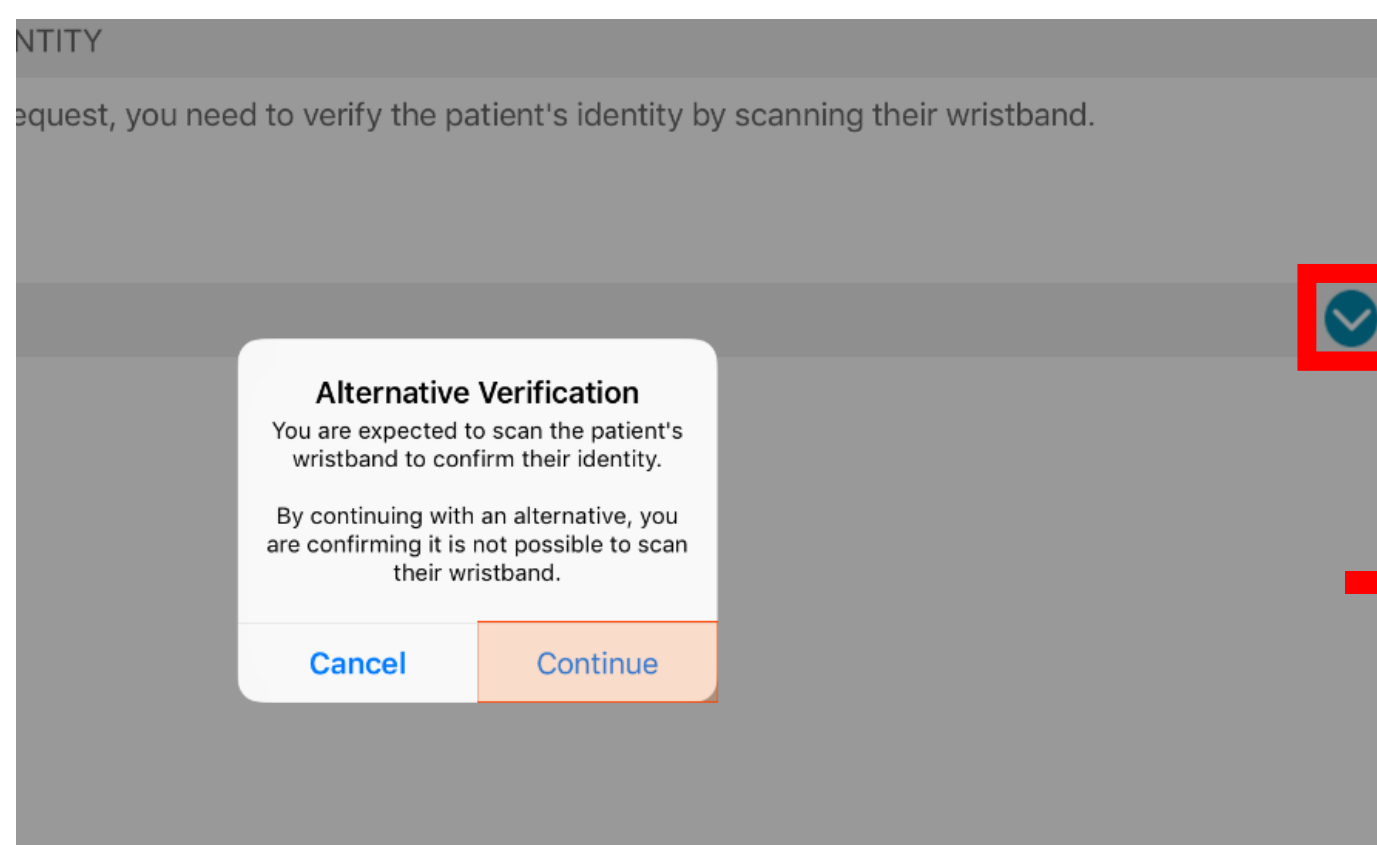

Remember, to scan the patient's square "QR" barcode on their wristband.

If you are unable to scan their wristband, please use PAS to print a new one.

Taking a Reading, Partial Observations and Interventions using the PPM+ mobile app

If it is still not possible to scan a patient's wristband, you are able to verify a patient by confirming their Date of Birth. Click on the blue drop down arrow and click continue on the message. Then enter the patient's Date of Birth.

Standard Observations

Respiration Rate (breaths/min)	Respiration Support
<input type="text"/>	<input type="button" value="No"/> <input type="button" value="Yes"/>

G2 - Mild grimace to pain

Pupil Size - Left Pupil Size - Right
Select... Select...

scard Submit

Submit

Select submit to record the observations to the Patient's record.

Taking a Reading, Partial Observations and Interventions using the PPM+ mobile app

A summary of the observations will then be displayed along with the Graded Response Strategy.

Leeds General Hospital, Great George Street, Leeds, LS1 3EA | TEL: 0113 4339920

RESULTS PAWS (Age 8 to 16 Years)		6
1. Notify the nurse in charge		
2. Contact the doctor immediately using the SBAR framework. Doctor to review within 30 minutes		
3. Perform full observations hourly (respiration, oxygen saturation level, pulse rate, blood pressure, capillary refill time and AVPU)		
4. Start continuous monitoring (ECG, oxygen saturation, blood pressure)		
Heart Rate	3	45 BPM
Respiratory Rate	3	30 breaths/min
Blood Pressure	0	Lying/Sitting 100/80
Capillary Refill Time	0	2 seconds
Oxygen Saturation	0	95%
Temperature	0	38 °C
Consciousness	0	Alert
Pain		1 - Mild Pain

Taking a Reading, Partial Observations and Interventions using the PPM+ mobile app

Pain	0 - None
TASKS	
3h	Observations Due
1m ago	Observations Intervention Required

When a full set of Observations have been taken (minimum Respiration rate and Heart rate). The task will then be completed. The tasks area shows when the next observations are due.

Patients with a PAWS score 0-2 will default to 4 hourly

If you are unable to take a full set of observations, scroll down to the bottom of the observation form and select from the available reasons.

Please indicate why it has not been possible to obtain a full set of observations

Patient Not In Bed

Patient Asleep

Patient Refused

Withdraw Intervention

Taking a Reading, Partial Observations and Interventions using the PPM+ mobile app

Remember, you can use the menu in the top right to quickly navigate to the ward view, Patient Actions and the Next and Previous Patients on your ward.

Countersigning, Charts and Tables

If an observation result requires a countersignature, the user will receive a prompt. The countersignature should be obtained as soon as possible to avoid any delays in the escalation process by a qualified member of staff.

Qualified Staff Only

You may be asked to review the results and enter in your PPM+ Username and Password then tap authorise.

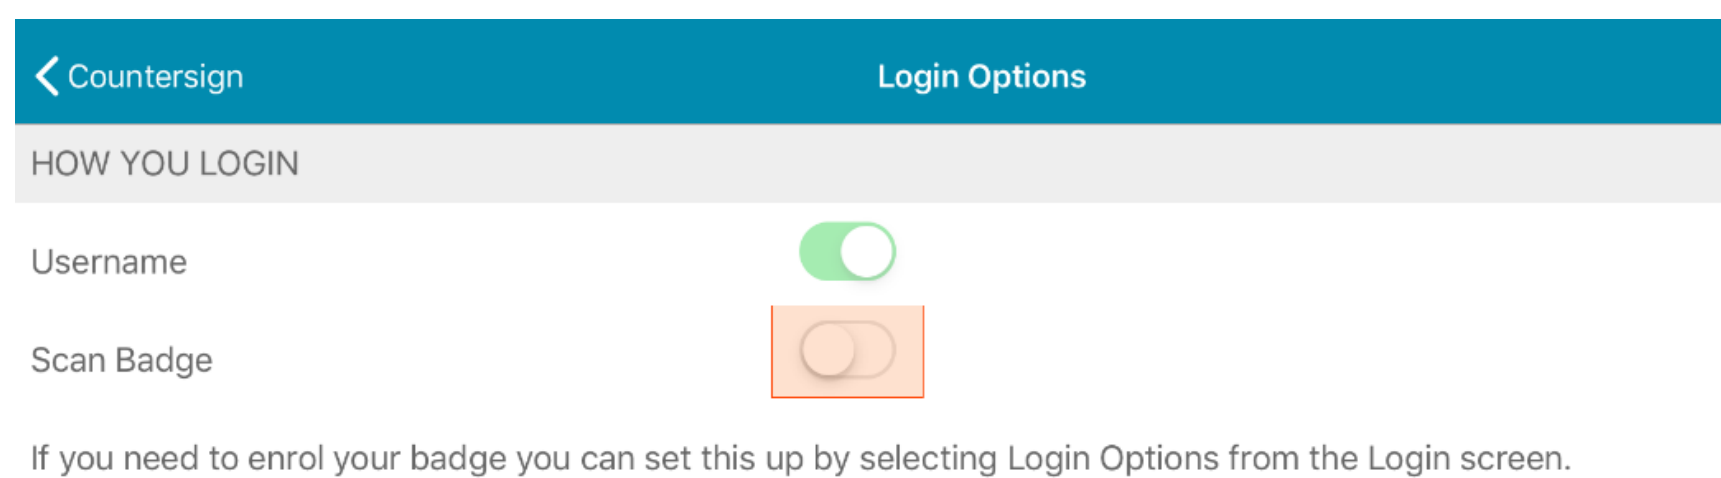

Countersignature to signal your approval.

Enter your PPM+ credentials to authorise the task

Authorise
Cancel

Qualified Staff Only

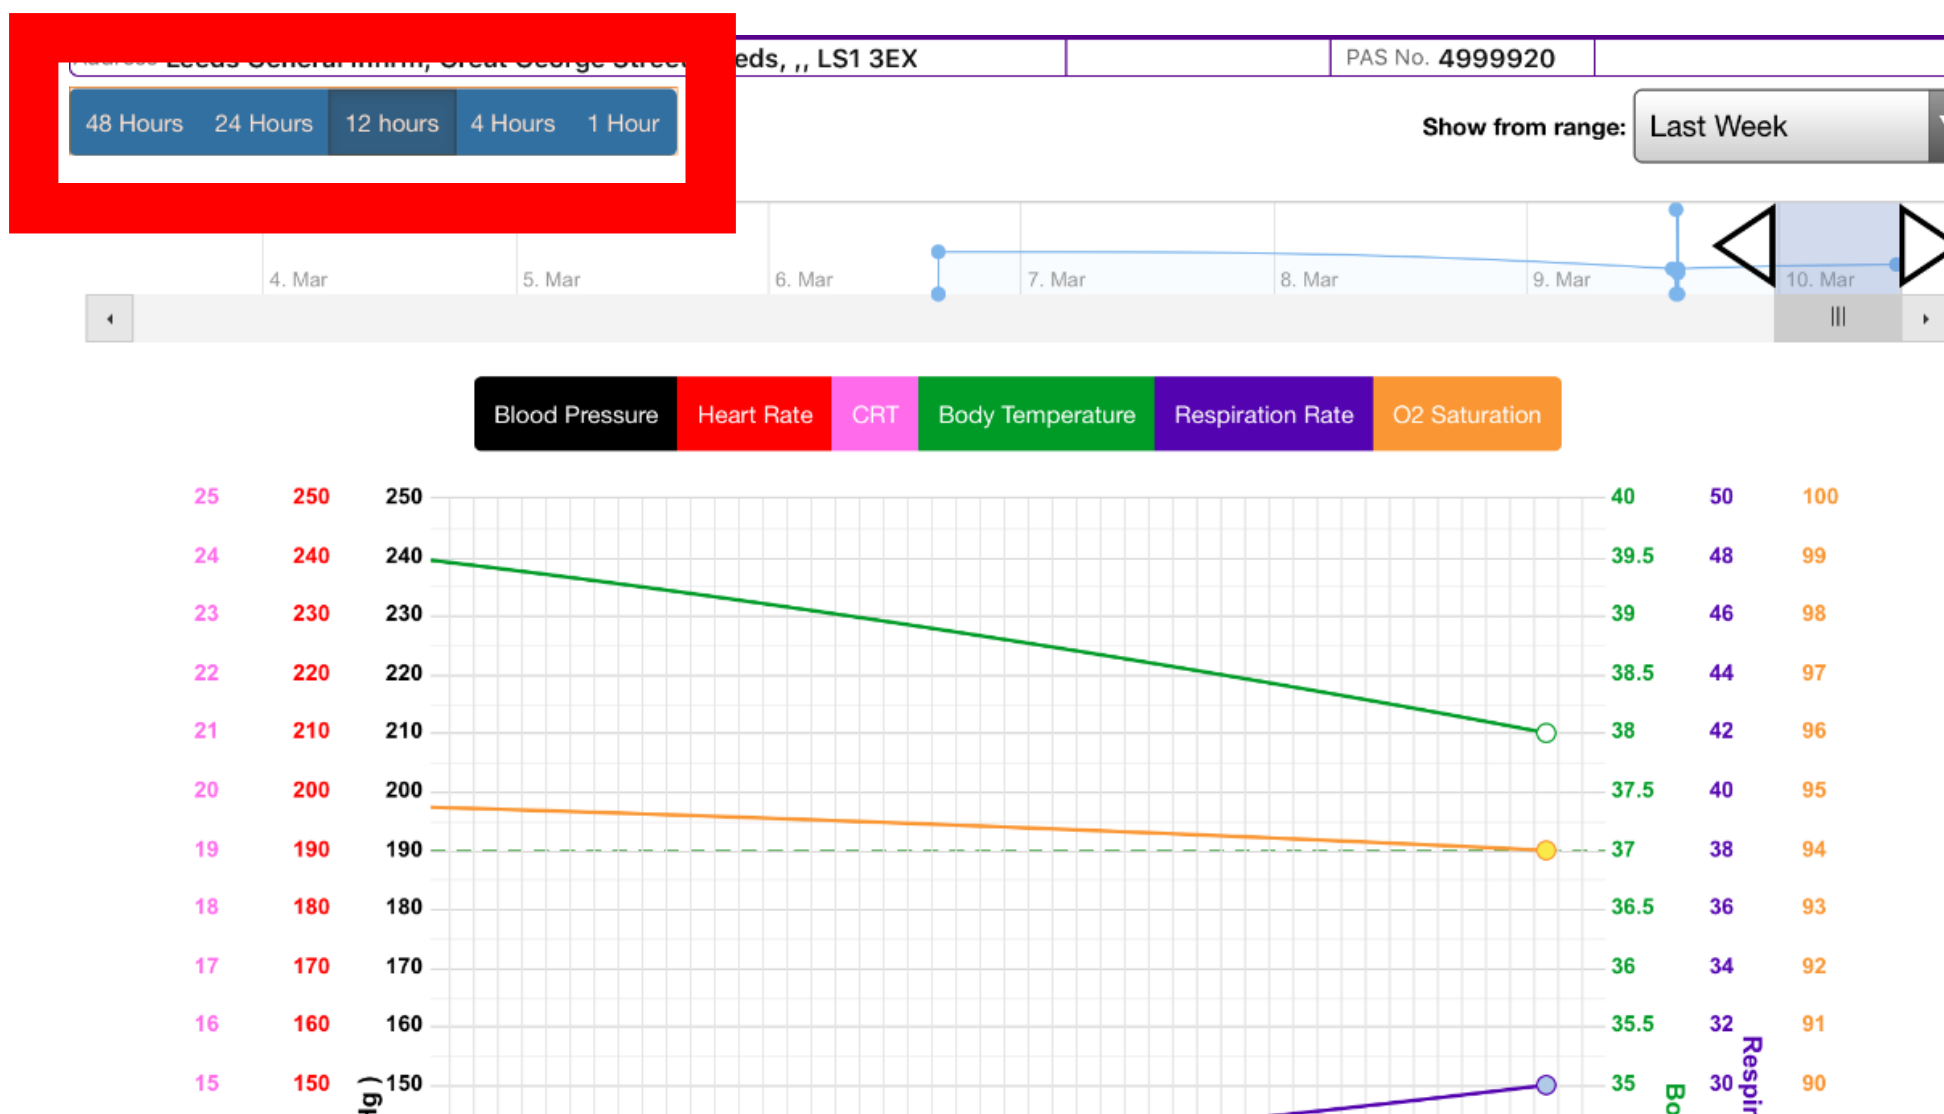

Alternatively, you can also countersign using your badge and PIN (if registered) by selecting Countersign Options. Then change to Scan Badge.

Countersigning, Charts and Tables

Once the observations have been authorised, remember to hand the iPad back to the original user as they will still be logged in.

You can view all electronically recorded observation in a chart form by selecting Charts.

The chart view will default to the last 12 hours but you can change the time period displayed with the buttons in the top-left.

Countersigning, Charts and Tables

You can also display a custom time period by using the sliders at the top right.

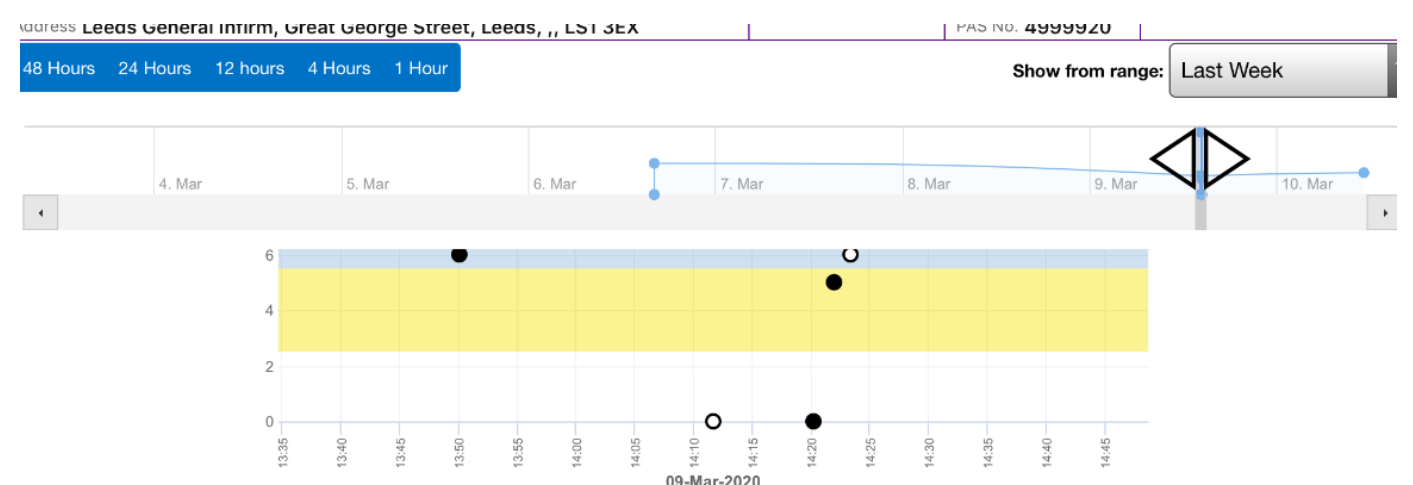

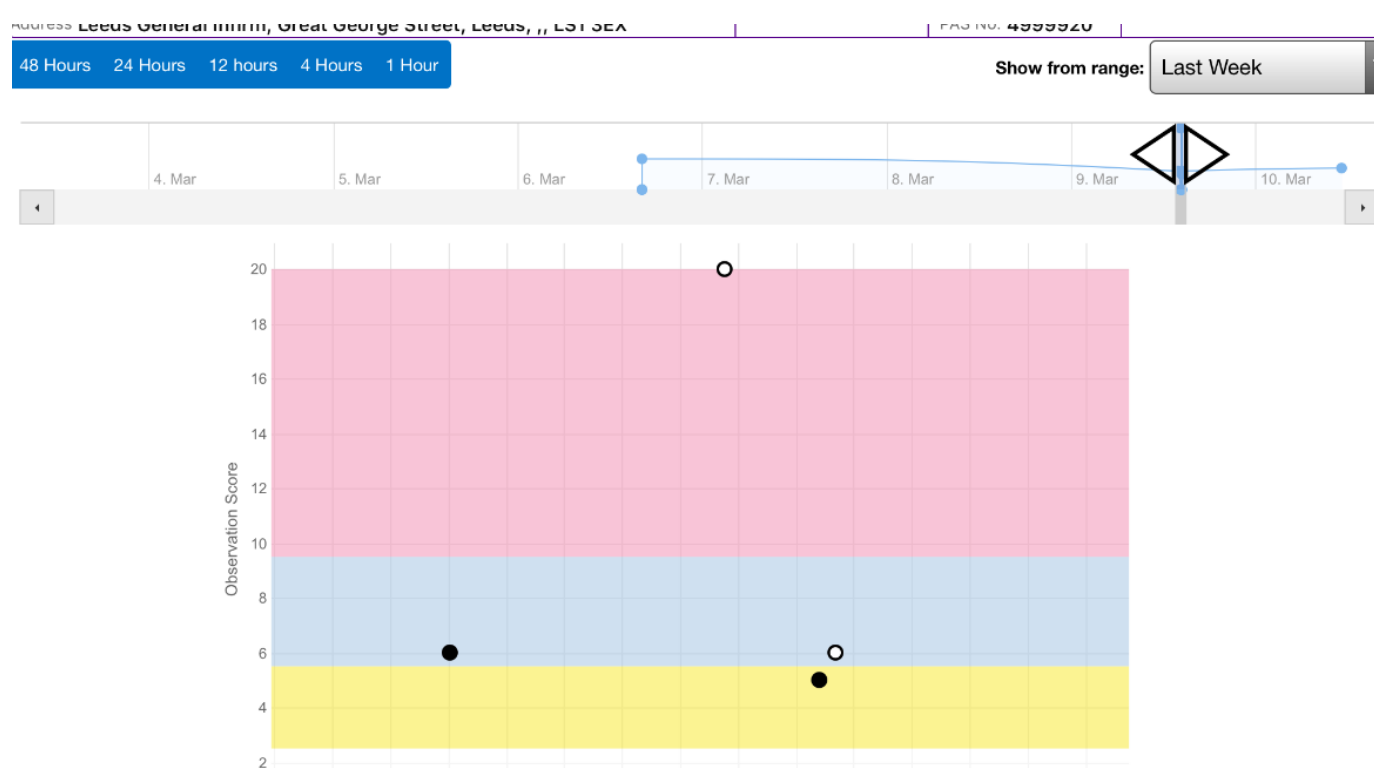

Notice how each individual observation point has been colour-coded to represent the result. White = 0 Yellow = 1 Blue = 3 Pink = 10

Countersigning, Charts and Tables

Select an individual result to view all readings displayed on the chart for that time.

Scroll down to view the rest of the charts and tables including overall PAWS scores and any additionally recorded observations.

* Please note that the time values in the table may not align with the time values in the graphs.

Yes

Countersigning, Charts and Tables

Withdraw intervention (where applicable). This will remove the intervention for that set of observations.

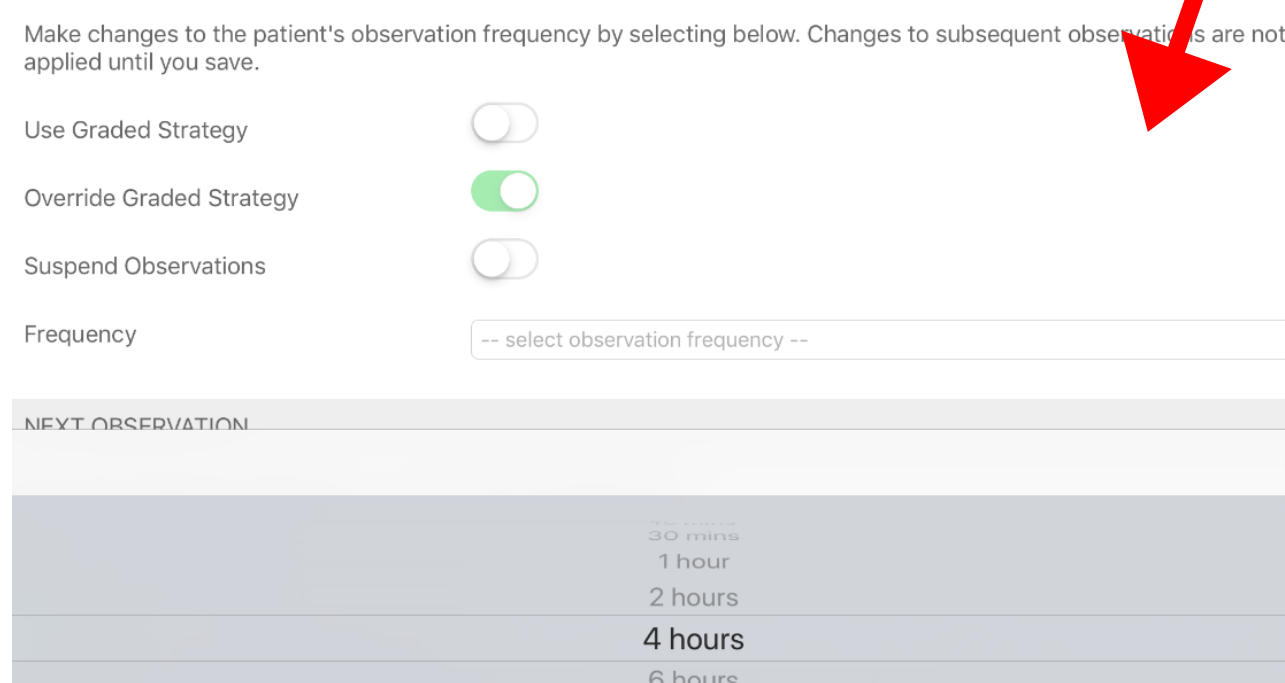

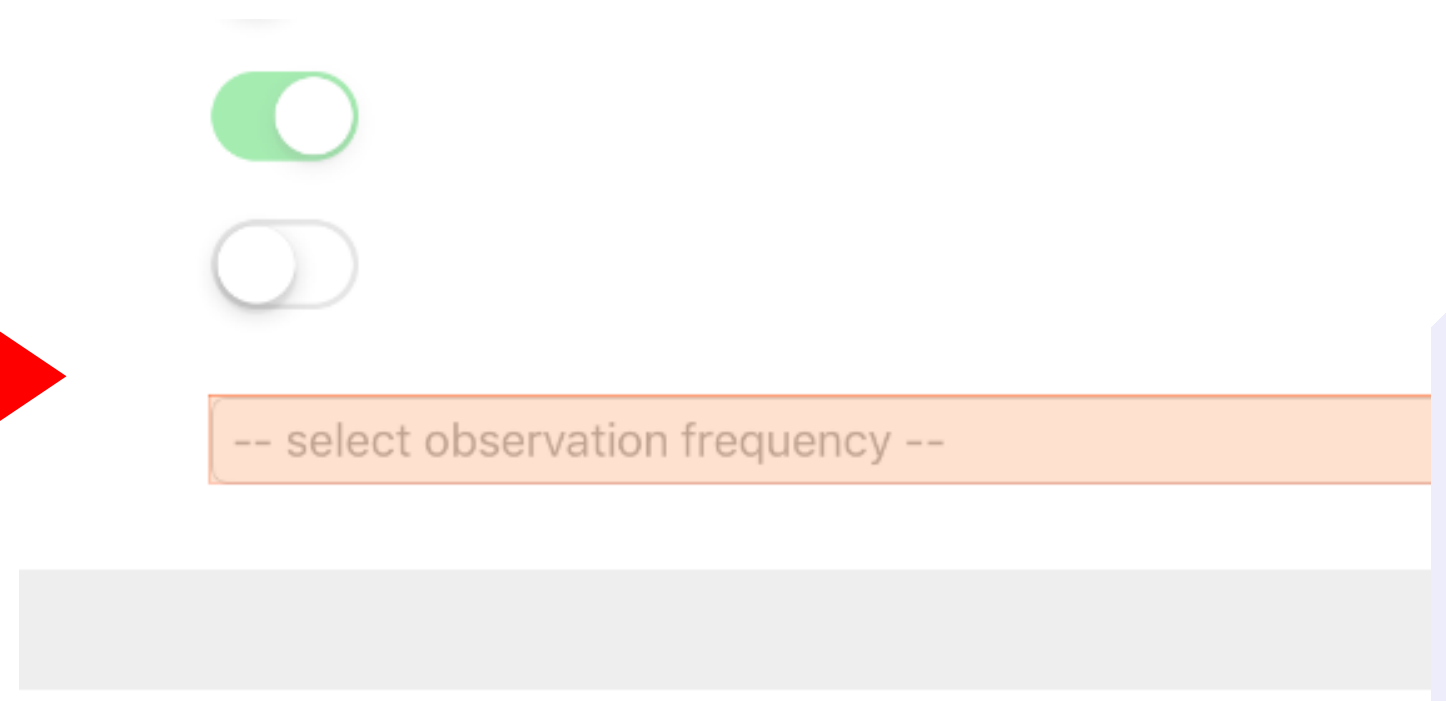

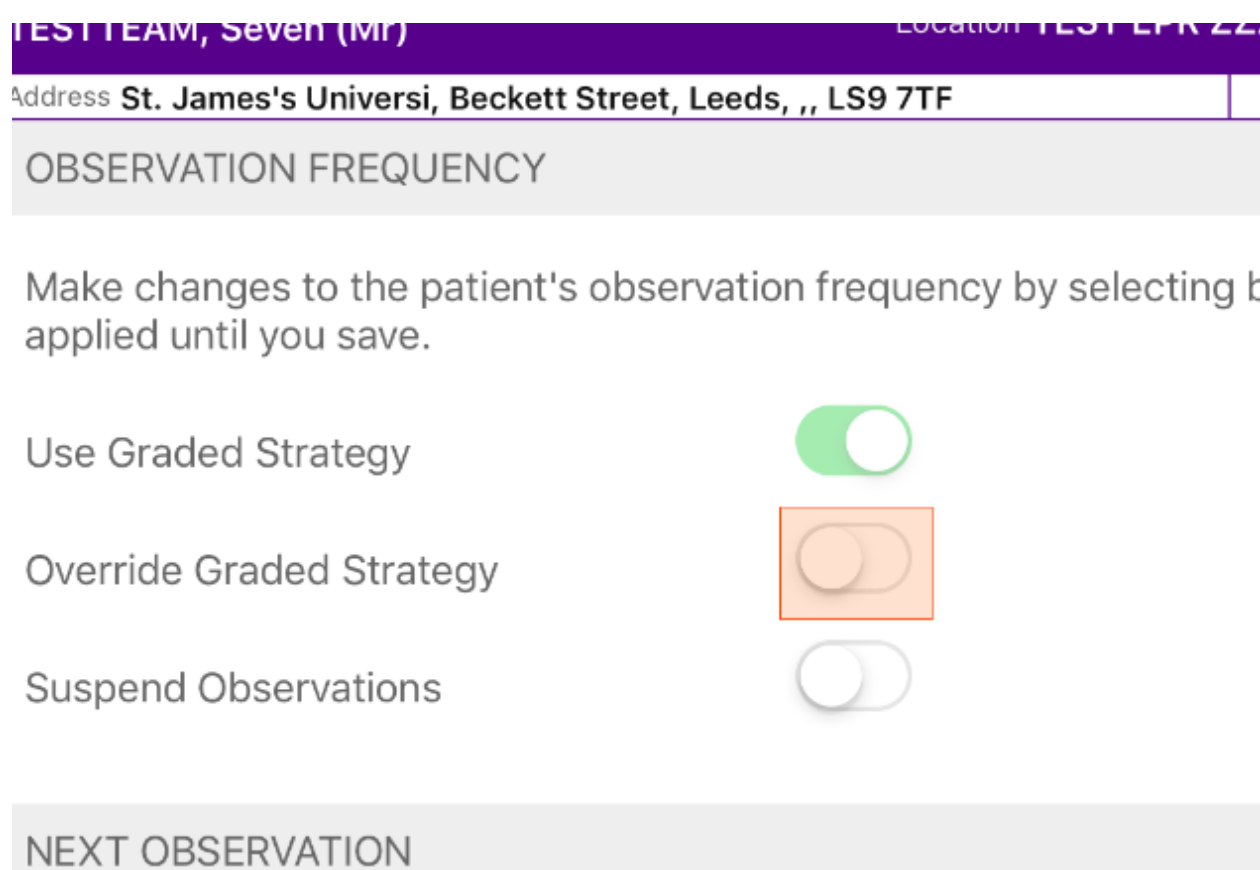

Settings

This Section Is For Qualified Staff Only

Select settings to override the graded strategy and suspend observations.

Select override graded strategy to select an observation frequency.

Settings

These two scenarios give examples of when observations are overridden.

Scenario 1

PAWS and Obs frequency is the same or lower

1/ Patient scores PAWS of 2 (4 hourly monitoring)

2/ Obs are overridden to 8 hourly monitoring

3/ Patient scores PAWS of 1

4/ Obs remain overridden to 8 hourly monitoring

Scenario 2

PAWS and/or obs frequency is greater

1/ Patient scores PAWS of 2 (4 hourly monitoring)

2/ Obs are overridden to 8 hourly monitoring

3/ Patient scores PAWS of 5 (1 hourly monitoring)

4/ Obs revert to Graded Strategy (1 hourly)

Settings

You will see an amber exclamation mark on the ewhiteboard for patients where the observation frequency has been overridden.

5y	7P (0)	↑	19h 30m
3y	0 (10P)	↓	45h 57m
14m	0 (24)	↓	34h 32m
13m	5		1081h 49m 
16y			Frequency Overriden to every 5 min
3y	1 (3P)	↓	154h 47m
3y	0 (4)	↓	34h 19m

16 Mins Ago	Countersign

Remember, a countersignature prompt will only be automatically generated when the observations are being recorded on an Ipad.

Desktop View

If you have completed an observation via a desktop (only if an Ipad is unavailable), you can complete an intervention (if applicable) by selecting the task underneath the results.

Observations Due

Observations Intervention Required

Countersign

If a non-registered member of staff has taken a set of observations via a Desktop and the countersignature is required a task will be shown underneath the results.

16 Mins Ago

Countersign

A registered member of staff can then countersign by signing into PPM+ either via a desktop or iPad and completing the Countersign Task. Remember, a countersignature prompt will only be displayed automatically when observation are recorded via an iPad.

Exceptions and scoring strategy with patients receiving O₂ therapy

Oxygen is a medicine and must be prescribed when administered to patients.

1. Oxygen is a life saving drug for patients with low levels of oxygen (hypoxia).
2. Some patients may be harmed by too much oxygen, as this can cause an increase in carbon dioxide levels.

Paediatric Advanced Warning Scores (PAWS) gives scores for SpO₂ in air and on O₂. Exceptions to these scores can be set, if deemed clinically appropriate, so that children with abnormal baseline values can still trigger alerts, if their condition changes.

Oxygen Saturation Score		
Score	SpO ₂ in air	SpO ₂ in O ₂
0	95 - 100%	
1	90 - 94%	95 - 100%
3	86 - 89%	90 - 94%
10	<85%	< 90%
Saturation Exceptions		
	SpO ₂ in air	SpO ₂ in O ₂
1		
3		
10		

The screenshot shows the PPM+ interface for a patient named EDITESTPATIENT, born 01-Jan-2011, male. The 'Observations' section is active, and the 'Settings' tab is selected. A range slider for 'Oxygen Saturation In Air' is visible, with segments for 0-64, 65-71, 72-82, and 83-100. The 'Settings' tab is highlighted in red.

On a paper PAWS chart the exceptions are documented in this section.

Within PPM+ exceptions are recorded here. (By clicking settings in the observations).

Please note: When setting an exception to SpO₂ on PPM+, it is not possible to a generate PAWS score >1 when SpO₂ is above the target value. This might result in a lower than anticipated PAWS score in certain circumstances.

For example, if the patient has target SpO₂ of 80%-85% but their actual SpO₂ was 95%, this might be harmful and warrant an elevated PAWS score, but the system would record a maximum score of 1 for this SpO₂ value.

Users should be aware of this anomaly with the PPM+ functionality and remember that any PAWS score does not replace clinical judgement in the clinical assessment of the deteriorating child.

Useful Contacts

Please contact the Implementation Team for Digital support & Training: Handover, Specialist Referrals, PPM+ Mobile, e-Obs, PAWS...

Ext: 60599

leadsth-tr.ImplementationTeam@nhs.net

Please contact the Informatics Service Desk at x26655 or visit the portal at <https://lth-dwp.onbmc.com>, to:

- **Reset your password.**
- **Report a problem you are having within PPM+ functionality.**
- **Report a data quality problem within PPM+.**
- **Request new user accounts for PPM+.**
- **Disable PPM+ accounts for any leavers from your department.**

Please contact the PPM+ EHR team at leadsth-tr.EPR@nhs.net if you have any development ideas or comments on your experience of using the EHR.

If you would like to make a request for change to PPM+, please contact us at: leadsth-tr.EPR@nhs.net with a completed Request For Change (RFC) form available [here](#).

Please contact the IT Training Department at ITTraining.LTHT@nhs.net if you require further training on PPM+ or any other Clinical System.
