

Ward Round Dashboard is now available on ppm+

The **Ward Round Dashboard** can be accessed via the **PPM+ Mobile app** and the **Desktop version of PPM+**.

The **Ward Round Dashboard** has been created to **support staff** with **Ward Round management**.

At present, there are **6 widgets** within the **Dashboard**: **Admissions**, **Diagnoses Relevant to current episode of care**, **Problems & Diagnoses**, **Allergies - From Medcharts/eMeds**, **Clinical Notes** and **Tasks**.

In the future, **additional widgets** will be added to support **Ward Round management**.

The screenshot displays the Ward Round Dashboard interface with the following components:

- Ward Round / Timeline** tabs and a **Refresh** button.
- Admissions** widget: Shows patient admission details for TEST EPR ZZZ (St James's University Hospital), Abbas A, 26/02/2024. Includes a length of stay of 10 months and navigation links.
- Diagnoses Relevant to current episode of care** widget: Lists active diagnoses like Provisional Asthma and Diabetes mellitus, with options to mark as relevant or irrelevant.
- Problems & Diagnoses** widget: Features a search bar, filters, and a list of active problems such as Provisional Asthma, Diabetes mellitus, and Closed fracture of femur, each with a 'Mark as Relevant' button.
- Allergies - From Medchart/eMeds** widget: Lists allergies including nuts and LIDOCAINE, both marked as 'Active - Confirmed'.
- Clinical Notes** widget: Includes filters for Type, Profession, Specialty, and Organisation, and displays a list of notes with details like 'Type: Discussion with family / others' and 'Subject: Discharge plan'.
- Tasks** widget: Shows a list of tasks with filters for 'Due / Overdue' and 'Due Soonest', along with a 'Refresh' button.

Scan this **QR code** to view the **User Guide** for the **Ward Round Dashboard** to learn more.
